# Introduction

For more than 50 years Cartubi has created custom-made mega yachts. Custom means starting every project with a blank page – building the dream of our Client – creating with our Client the exclusive and unique character of his yacht and bringing to life their dreams.

*Your dream is our challenge.*

# Philosophy and mission

IV

*The passion for our profession  
The professionalism and devotion on our projects  
The quality of our products and services  
The ability to fulfil the desires of our Clients  
The unmistakable mark of the “Made in Italy”  
make us a unique and compact force.*

Our continuous challenges focused on growth and research are directed to the innovation of global ecology and climate, innovative resources to achieve reduced impact, general innovation, reduced atmospheric emission, reduced consumption, higher performance, desalination systems for potable water, sustainability and research, solar power, certifications.

# Facilities

The overall surface of 62.000 sq.m of which 15.000 sq.m are covered areas and the capacity to house up to 10 yachts between 30m and 100m; makes Cartubi the biggest shipyard in the northern Adriatic Sea and an optimal base from which one can carry out charters in the Adriatic and Mediterranean Sea.

*From start to sea*

*From design to build*

*From conception to delivery*

*Problem solving*

*Advise on regulation*

*Information technology systems*

*Installing new engines*

v

# Teamwork

*To love yachts is to love the sea,  
to love the sea is to respect the environment.*

Our value is represented by the constant effort of the workforce whom have been part of Cartubi for many years; the results of our projects are represented by the skills and professionalism of our team. We yearn for challenges because they make us grow and improve.

One of our greatest strong-points is the high professionalism and knowledge of the team coupled with the perfected synergy and size.

VI

# New Building

VII

We build “turnkey” the dreams of our Clients (creative, engineering, procurement, construction and outfitting skills).

During the whole project our Project Manager is the point of reference/contact between the Client and our skilled team (from engineering to construction teams and to control every process with maximum attention to quality and safety).

Our services:

- concept creation and prototyping
- budget and implementation time setup
- definition of all and every technical and construction detail.

# Bringing dreams to life

This is our main goal: bringing your dreams to life, seamlessly operating from concept to design, from construction to luxury fitting, Your dream yacht awaits you here, at Victory.

*The making of a dream*

# Refitting and repair

Our services:

- technical management
- general operations
- procurement
- crew management
- insurance
- full-scale refits and conversions are carried out at our shipyard in Italy, for example: hauling, ship launching, docking, carpentry, metal and fiberglass work, steel and alloy repair, mechanical repair on all types of engines and transmissions, installations and maintenance of hydraulic electric and electronic systems, anti-corrosion and anti-osmosis treatments, professional painting, restyling and repairing of interiors
- maintenance concepts and schedules
- time and works schedules for servicing and inspections
- a spare parts database and internet support ensure swift and trouble-free work.
